The "Disclosure of Enterprise Systems" chart is a list of the software applications and computer systems ("Product") that OCERS currently uses to manage data. Also listed are the vendor, the product's purpose, a description of the data it manages, the OCERS department that serves as the primary custodian, and how often the data is collected and updated. This information is provided in compliance with Senate Bill No. 272 (Government Code Section 6270.5), effective July 1, 2016.
